2009 "BEST FEATURE
DOCUMENTARY"

I know for sure we're not alone in the universe. I have been alleged to be in on the fact that we've been visited on this planet even covered up by our governments for sixty years now.
Astronaut Edgar Mitchell, the sixth man to walk on the Moon

The evidence suggests we are being signaled by an intelligence that's not our own. Full of breathtaking footage of crop circles, circle enthusiasts, including John Mack and JAR luminary Barbara Lamb, try to make sense of why the world ignores these wonders—the globe's most persistent and beautiful mystery.

"Filmmaker Suzanne Taylor has created a magnificent, startlingly brilliant film. . . Groundbreaking crop formation documentary. Incredibly beautiful and powerful."

—Whitley Strieber

Secrets of Antigravity Propulsion

Tesla, UFOs, and Classified Aerospace Technology

PAUL A. LaVIOLETTE, Ph.D.

In *Secrets of Antigravity Propulsion*, physicist Paul LaViolette explains the secret history of antigravity experimentation, including gravity-control technologies capable of revolutionizing air travel and energy production. He reveals classified projects to develop an aerospace propulsion system using beams of microwave energy similar to those used by the craft flying over Area 51. Using subquantum kinetics—the science behind antigravity technology—LaViolette reviews field-propulsion devices and technologies with thrust-to-power ratios thousands of times greater than jet engines and whose effects are unexplained by conventional physics and relativity theory. He includes controversial evidence about the NASA cover-up of these advanced technologies.
